                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                12
                                                                                                      MITCALANEOUS: INTERNAL ACIDIFICATION. ACTIVATED BY PROTEIN KINASE C.

SUBLITIENAL ACIDIFICATION. ACTIVATED BY PROTEIN KINASE C.

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL).

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL).

TISSUE SPECIFICITY: WIDELY EXPRESSED WITH HIGH LEVELS IN HEART BRAIN AND LOWER LEVELS IN PLACENTA, LUNG, LIVER AND KIDNEY.

MISCELLANEOUS: INTERNAL ACIDIFICATION. ACTIVATED BY PROTEIN KINASE C.

SIMILARITY: BELONGS TO THE TWO PORE DOMAIN FAMILY OF POTASSIUM
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ELAGNHNQELTPCRRTLSVNHLTNERDV - - LPPLLKTESIY

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL).

TISSUE SPECIFICITY: WIDELY EXPRESSED. HIGHEST EXPRESION IN BRAIN,

KIDNEY, THYROID, SALLVARY GLAND, ADRENAL GLAND, PROSTATE,

EPIDIDYMIS, UTERUS, PLACENTA, COLON AND JEJUNUM. MODERATE

EXPRESSION IN EYES, PITUITARY, PANCREAS, SMOOTH MUSCLE, TESTIS AND

OVARY. VERY LOW LEVELS IN LUNG, AORTA, LIVER, HARART, SKELETAL

MUSCLE, THYMUS AND SPLEEN. IN THE BRAIN, HIGHEST EXPRESSION IN

CEREBELLAR GRANULE CELLS, BRAINSTEM, HIPPOCAMPUS AND CEREBRAL
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   DEVELOPMENTAL STAGE: EXPRESSION DETECTED AS CONCEPTION. EXPRESSION INCREASES FROM 2-8 DA STABILIZES AFTER DAY 8.
MISCELLANEOUS: INHIBITED BY QUININE, BARIUM, ACIDIFICATION. ACTIVATED BY PROTEIN KINASE (SIMILARITY: BELONGS TO THE TWO PORE DOMAIN IN THE PROTECTION OF THE TWO PORE DOMAIN IN THE PROTECTION OF THE TWO PORE DOMAIN IN THE PROTECTION OF THE TWO PORE DOMAIN IN THE PROTECTION OF THE PROTECTION OF THE TWO PORE DOMAIN IN THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION OF THE PROTECTION

FUNCTION: PH-DEPENDENT, VOLTAGE-INSENSITIV, BACKGROUND POTASSIUM CHANNEL PROTEIN. RECTIFICATION DIRECTION FOR ACTS AS AN ION CONCENTRATION ON EITHER SIDE OF THE 10. BRANE. ACTS AS AN OUTWARD RECTIFICER WHEN EXTERNAL POTASSIUM "NOCENTRATION IS LOW. WHEN EXTERNAL POTASSIUM CONCENTRATION IS INWARD. SUBCELULAR LOCATION: INTEGRAL MEMBRANE ("POTENTIAL). STRONGEST TISSUE SPECIFICITY: WIDESPREAD EXPRESSIO, 37 4 ADULI, STRONGEST EXPRESSION IN PANCREAS AND PLACENTA. LOW A SYPRESSION IN BRAIN, LUNG, PROSTATE, HEART, KIDNEY, UTERUS, S. T. INTESTINE AND COLON.

- FUNCTION: PH-DEPENDENT, VOLTAGE-INSENSITIVE, BACKGROUND POTASSIUM CHANNEL PROTEIN. RECTIFICATION DIRECTION RESULTS FROM POTASSIUM ION CONCENTRATION ON EITHER SIDE OF THE MEMBRANE, ACTS AS AN OUTWARD RECTIFIER WHEN EXTERNAL POTASSIUM CONCENTRATION IS LOW.

WHEN EXTERNAL POTASSIUM CONCENTRATION IS HIGH, CURRENT IS INWARK
                                                                                                                                                                                                                                                                                                       SUBUNIT: HOMODIMER (POTENTIAL).

SUBCELLULAR LOCATION: INTEGRAL MEMBRANE PROTEIN (POTENTIAL).

TISSUE SPECIFICITY: VERY STRONG EXPRESSION IN HEART, ALSO DETECTED IN KIDNEY, BRAIN, SKIN, TESTIS, LUNG, SKELETAL MUSCLE, SMALL INTESTINE AND STOMACH. NOT DETECTED IN LIVER, THYMUS OR SPLEEN.

MISCELLANGOUS: INACTIVATED BY BARIUM.

SIMILARITY: BELONGS TO THE TWO PORE DOMAIN FAMILY OF POTASSIUM

TISSUE SPECIFICITY: STRONGEST EXPRESSION IN HEART. MODDERATE
EXPRESSION IN LUNG AND BRAIN. LOW LEVELS IN LIVER, KIDNEY AND
SKELETAL MUSCLE.
SKELETAL MUSCLE.
MISCELLANEOUS: INHIBITED BY EXTRACELLULAR ACIDIFICATION, ZINC
BUPIVACAINE AND PHENYTOIN. ACTIVATED BY PROTEIN KINASE A.
SIMILARITY: BELONGS TO THE TWO PORE DOMAIN FAMILY OF POTASSIU
CHANNELS.
